## Enroll Status Codes

**Purpose:** *Administration* – This document provides the enrollment status codes to use in basic searches for student enrollment.

From the start page in PowerSchool users can search for students meeting certain criteria including their enrollment status. In order to find the correct students users need to have the correct search criteria for input.

The student field name to use in your search will be enroll\_status. The codes you use that follow the field name will be:

- -1 for **Pre-enrolled** or **Pre-registered**
- 0 for Currently **Active** (clicking All will retrieve the same data)
- 1 for **Inactive**
- 2 for **Transferred**
- 3 for **Graduated**
- 4 for **Historical Import**

**Example 1:** You want to find all the students in your school that you have pre enrolled. This could be a student that is moving into your system after a holiday but you have him/her pre enrolled now. Your search window would look like this.

Because you are searching for students that are actually inactive at this time you need to remember to add the / before your search string.

### Search Students

[View Field List](#) [How to Search](#)

**Example 2:** You want to find all students who have transferred out of your school.

Again don't forget the / as you're searching for inactive students.

### Search Students

[View Field List](#) [How to Search](#)

**Example 3:** You are interested in finding all the students that have graduated from your school.
