

# PowerSchool Health

PowerSchool Premier 6.1 features a new health component that allows schools and districts to capture and manage health-related student information within the SIS. Highlights include:

- Immunization management that accommodates an unlimited number of vaccines, quick data entry, and provides real-time dose date validation.
- Health screenings and waivers for hearing, oral, scoliosis, tuberculosis, vital signs/biometrics, and vision exams.
- Capture health-related grade level entry requirements and track student compliance.

The following table contains a complete list of the health features introduced in PowerSchool Premier 6.1.

Feature/Enhancement	Description
Vaccine Configuration	Define an unlimited number of vaccinations and associated doses. Flag vaccines as mandatory or optional.
Immunization Import	Import student immunization data, including dose dates, certificate types, and exemptions, into the Health area using PowerSchool's Quick Import function.
Immunization entry	Real-time date validation, support for default certificate types, and quick movement between dose cells makes transcription painless.
Immunization compliance	Flag immunizations as noncompliant and/or exempt and record vaccine-specific comments. Color-coding and icons help to quickly determine a student's immunization status.
Change History	User name, date, and time of any change to student immunization or screening information is recorded along with change reason information entered by the user. The entire change history for a student's immunizations or screenings is available at the click of a button.
Health Screening Configuration	District control over all dropdown list values and associated codes in each of the six screening types.
Health Screening Entry	Record an unlimited number of hearing, oral, scoliosis, tuberculosis, vision, and vital signs/biometrics examinations. A screening summary page provides quick access to historical screening information.
Health Screening Waivers	Capture screening waiver information, including associated screening type, waiver date, parent/guardian name, reason, and associated comments. Create waiver specific to each screening type.
Grade Level Entry Certification	Capture health-related grade entry requirements and add certification records to students, capturing certification status, date, and related comments.
Health Area Security	Users within a security group can be assigned no access, view only access, view/modify access, or view/modify/delete access to specific areas of Health.
