

Report Name: *Low Current Grades All Activities*

This report will print out a list of students with low current grades or percents for the term you specify. You can choose an activity and only have those in that activity appear on the final output. Otherwise the report will run for all the students in the school.

Comments: The information is pulled from the data table that keeps track of current grades, so please keep in mind the information will only be as up-to-date as the teacher's use of the gradebook. To default items to the same choice the next time you run the report, place a check mark in the box to the far right of the item.

Note: You should only import one report of the same name. If you want to import more than one of them, you will need to change the name and id of the reports so they don't have the same information. If two or more reports are in the system with the same name/id, neither will work.
